

Task 2:

Step 1:

npm install (this include all libraries)

Step 2:

Node server.js

On google chrome/firefox

Run :: <http://localhost:8080/api-docs/>

Step 3:

There exist all endpoints signup, login, wallet, trade

Firstly do sign up for creating the users

Create 2 users for trade

Initially balance is 500CAD

Initially we have 20 share for each user

1 share cost is 20 dollars

Step 4:

By login we can get the object id of every user.

Through which we can trade.

For trade we need a user id which we will get from mongo server
